Salt Lake City, Utah 84114-5801

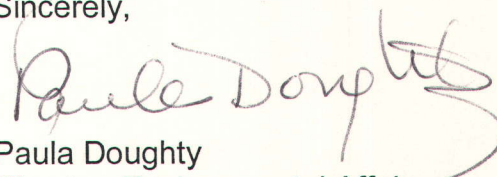

Subject: Notification of Little Valley Borrow Site Located within Permit Boundary
M/035/002.

Dear Mr. Jensen,

Kennecott Utah Copper Corporation would like to use a small site located in Little Valley as a borrow site. The borrow site covers less than 3 acres and contains coarse sand to gravel sized alluvial material. The plan is to borrow approximately 10,000 cubic yards of this material and haul it to the Kennecott Refinery to construct a rail turn-around next to the existing tracks. The borrow site is within the Division of Oil, Gas and Mining (DOGM) permit boundary for the Bingham Canyon Mine (M/035/002).

Prior to excavation, top soil will be salvaged and bermed up gradient of the borrow area for later use during final reclamation. Once the site is no longer useful as a borrow site it will be re-graded into a natural-looking landform and cross ripped for erosion control, followed by top soil placement and seeding. If you have any additional questions, please call me at 569-7120 or Vicky Peacey at 569-7118.

Sincerely,

Paula Doughty
Director, Environmental Affairs
